

Onyx Deskset XL

ONYX Deskset models are ideal "on-the-go" low vision solutions for clear, powerful magnification that is portable, adaptable, and easy to use. They fit in any classroom, business, or home environment and move from one viewing situation to the next as quickly as you do.

The camera's mounting arm has three axes, and the camera itself rotates up to 350 degrees, enabling you to place it in an almost endless number of positions.

The telescopic camera arm provides working space under the camera and the monitor can be raised and lowered and tilted forward and backward for maximum comfort. The camera can be pointed at a black board or at the desk for reading close-up. It is also possible to view an object in front of the monitor.

The Onyx Deskset is available with a 19" and 22" LCD monitors. An X/Y reading tray is optional and makes reading books more ergonomical.
